13. SUMMARY

SUBJECT (b)(1) states that TW CW personnel believe that US de-emphasis of chemical and biological warfare is a great mistake. CEN LUI Ju-Tsi, chief of the TW Army chemical service is convinced that if war should breakout betwee TW and the PEOPLE'S REPUBLIC of CHINA (CH), CW agents primarily of a persistent nature will be used extensively by both sides. He suggested frequently (b)(1) that the US is not really appreciative of the capacity of CH to wage chemical warfare. (b)(1) TW intelligence indicates that CH CW agent reserves are considerably greater than those of TW. He is of the opinion that these reserves also exceed those of the US and possibly even those of the USSR, although he was unable to support this belief (CNFI). (b)(1)
